XDocs WEX™
simple browser based content creation and review
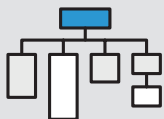

info@bluestream.com
www.bluestream.com

Accurate documentation development relies on SME (Subject Matter Expert) contribution, but within a DITA workflow this has always proved difficult.

< Benefits >

> Streamline the collaboration process.

> Minimize SME disruption.

> Reduce the time taken to approve content.

> Enable SMEs to create DITA content without having to learn complex tools.

> Eliminate the risk of inaccuracies.

> Full audit trail.

SMEs do not have the time or desire to learn XML authoring; as a result, Writers have had to rely on PDF mark-up, MS Word track-changes, or email exchanges. Unfortunately, these approaches are slow and can also lead to errors leading to another review cycle.

XDocs WEX lets all parties involved in content creation contribute in a meaningful way. With **XDocs WEX**, SMEs can quickly review and approve content, share ideas, and more in a simple web browser.

End-to-end

XDocs DITA CCMS is a complete solution. Your content team can create, review, find, update, manage, localize and deliver content with unparalleled agility.

Solutions for all your content challenges

Delivering content for different audiences, languages, and publish outputs is simple. Delivery is agile, automated, and responsive.
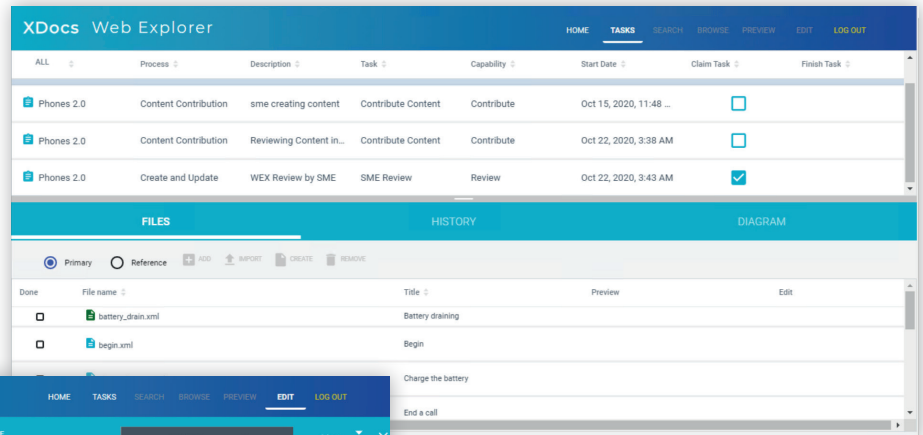

Easy-to-deploy

Out-of-the-box **XDocs DITA CCMS** is fully functional and feature rich. Customization is simple and it can be installed and deployed in hours.
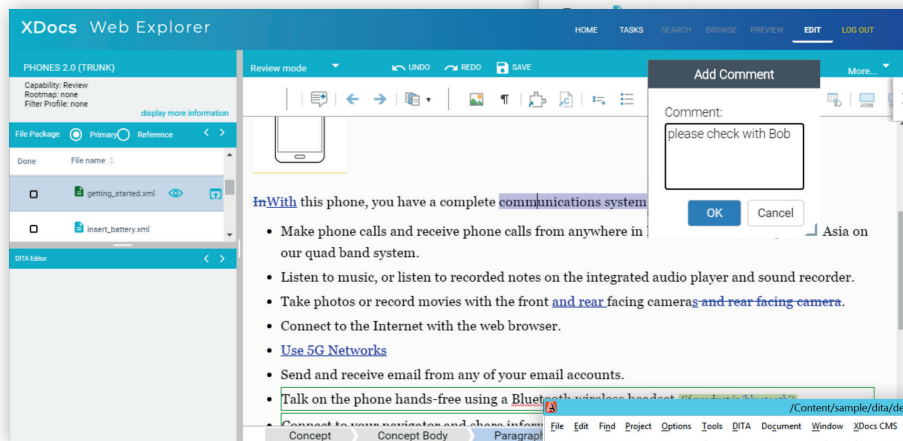

< Introduction >

XDocs WEX is a web-based application for the online review and contribution of DITA content. The premise behind the app's development is simple – no training or installation would be required to use **XDocs WEX**. The target audience for this application is anyone in the organization who needs to be part of the content lifecycle.

With **XDocs WEX**, SMEs can be notified by email when their input is required. In addition, a simple interface displays outstanding tasks.

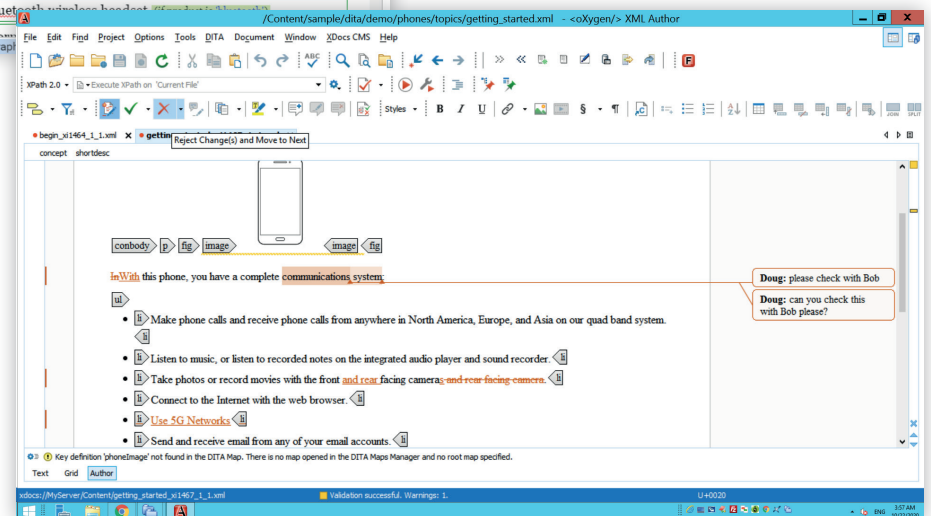

Marking up changes and adding notes replicates the experience of standard authoring applications, and no additional learning is required.

All mark-up and annotations are created as DITA and are immediately viewable by other Users and other tools. Such as the Technical Author using desktop Oxygen Author.

With **XDocs WEX**, anyone can create new DITA Topics – without the need for additional training.

XDocs WEX solves the problem of how to include SMEs and others in the content workflow.
